### **DETAILED ACTION**

### Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 03-23-06 has been entered. Accordingly claims 2-4, 7-11, 15, 17-19, 21, 25-50 are pending in the application.

## Claim Objections

2. Claims 25, 46, and 49 are objected to because of the following informalities:

Claim 25, line 2, "said memory module" lacks antecedent basis.

Claim 46, line 2, "the connector " lacks antecedent basis.

Claim 49, line 2, "the connector " lacks antecedent basis. Appropriate correction is required.

## Claim Rejections - 35 USC § 102

- 3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:
  - A person shall be entitled to a patent unless -
  - (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 2-4, 11, 17-19, and 45-47 are rejected under 35 U.S.C. 102(b) as being anticipated by Brown et al. (U.S. Patent 6,172,895).

Application/Control Number: 10/628,517

Art Unit: 2827

Regarding claim 2, Brown teaches a memory module (in figure 3) comprising a plurality of memory devices (28) which share a bus line (20) on a board (last RIMM card 54) wherein the bus line connects terminals of said plurality of memory devices in a stubless configuration and an end of said bus line is terminated (by resistor 52) and wherein at least a part of said bus line is a strip line (channel 20 comprises of strip lines).

Regarding claim 3, Brown discloses at column 8, lines 3-7, an effective characteristic impedance of said bus line is matched with a characteristic impedance of a line on a motherboard on which said memory module is mounted.

Regarding claim 4, Brown discusses at column 3, lines 1-9, at least one of said plurality of memory devices is a memory device in which a termination circuit is included and wherein the memory device in which said termination circuit is included terminates the end of said bus line.

Regarding claim 11, Brown shows in figure 3, signal terminals of said plurality of memory devices (28) connected in the stubless configuration are connected at one point on the bus.

Regarding claim 17, Brown teaches the memory devices (28 in figure 6) each have a package board (80) that makes an electrical connection between a memory chip pad and said board (82) and wherein said package board has a strip line for use as a signal line of said bus line in said package board. (See column 7, lines 27-32).

Regarding claim 18, Brown shows in figure 3, the memory module is configured as a multi-chip module.

Application/Control Number: 10/628,517

Art Unit: 2827

Regarding claim 19, Brown shows in figure 6, the board (82) of the memory module is divided into a plurality of boards (80) and said plurality of boards are each connected by inter-board connection means (channel 20).

Regarding claim 45, Brown shows in figure 3, the bus line (at portion 26, 30) is approximately parallel to a short side of the memory module.

Regarding claim 46, Brown shows in figure 3, the bus line (at portion 26, 30) forms a right angle with a connector (22).

Regarding claim 47, Brown describes at column 5, lines 53-61, the terminals of the memory module are disposed on a front surface and a back surface of the memory module.

## Allowable Subject Matter

- 5. Claims 9-10 are allowed.
- 6. Claims 7, 8, 15 and 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 7. Claims 25, 46, 49 are objected to for including deficiencies as set forth in the Claim Objections Section.
- 8. Claims 26-44, 48 and 50 are objected to for their dependency on claim 25.

#### Conclusion

9. The prior art made of record cited on Form PTO-892 is considered pertinent to applicant's disclosure.

Application/Control Number: 10/628,517
